

Cisco IOS IPS Supported Signature List For 5.x Signature Format in 12.4(11)T T-train and Later Release

Overview

In Cisco IOS Software Release 12.4(11)T and later release, Cisco IOS IPS supports 5.x signature format. Cisco posts signature package in 5.x signature format at the following location

<http://www.cisco.com/cgi-bin/tablebuild.pl/ios-v5sigup>.

With the support of 5.x signature format, IOS IPS supports NDA (encrypted) signatures that are not supported by signature format 4.x. This document provides a list of signatures that are supported by IOS IPS in 12.4(11)T and later releases.
